

Professional and Color Consistent Printing with PrinTao® 8 and Epson® Stylus Large Format Printers

Kiel, Germany, November 11th, 2013 ■ LaserSoft Imaging releases the professional printing software PrinTao 8. This newly developed program allows professional printing by means of an intuitive user interface. PrinTao 8 achieves color fidelity, without the need to adjust any complex printer driver settings. Printing has become more efficient and economical.

Using PrinTao 8, both amateur photographers as well as professionals just need a few mouse clicks from layout to color consistent printing. The clearly structured Start-Pilot is a great tool for selecting printer model, paper type and size as well as output quality with a few mouse clicks.

PrinTao 8's ICC color management is based on one of the best color engines in the world with special focus on accuracy and performance. It takes full advantage of the entire printer's color gamut. Highest print quality standards are met in very high quality; accurate, reliable, and consistent color reproductions.

Beneath PrinTao's intuitive user interface, it combines the most important printing functionalities from image processing and layout software, such as adjusting resolution and resizing images.

The PrinTao 8 Media Manager uses a constantly updated online database to manage and install paper profiles. In addition to the Epson manufacturer papers, it contains the profiles for the most important papers of many renowned quality paper manufacturers like *Canson*, *Hahnemühle*, *Ilford*, *Tecco* and *Tetenal*. This database is constantly expanded by newly released papers.

In PrinTao 8, pre-designed templates facilitate the creation of print layouts. The pack templates are especially designed for photographers. These allow multiple copies of an image in different sizes on the print medium.

An intelligent nesting algorithm calculates the optimum arrangement to keep paper usage to a minimum.

PrinTao 8 is now available as a download from EUR 99,00. It runs under Mac OS X 10.7 or later with a variety of Epson Stylus printers.

About LaserSoft Imaging® AG:

LaserSoft Imaging was founded in 1986 by physicist Karl-Heinz Zahorsky who developed the concept of SilverFast in Kiel, Germany. Today SilverFast is regarded as the standard software for scanners and digital cameras for both beginners and professionals. The SilverFast range of products includes software for scanners, digital cameras, printers and for HDR imaging, as well as several specialized solutions. LaserSoft Imaging is fabricating quality targets for IT8 calibration in their own production. SilverFast has won the EDP-Award for the Best Color Management Software of the Year 2008. With over 2.5 million copies sold and as a bundle partner of the major scanner manufacturers, SilverFast is the most successful scanner software in the world.
